

EXPERIENCE

- Tata 1mg

Software Development Engineer 2

Chandigarh
Apr 2026 – Present

- Led migration of Insurance Category and Insurance Upsell services (**2+ cron jobs, 10+ APIs, AWS integrations**) from Ruby on Rails to **Python FastAPI**, driving execution alongside an intern by providing technical guidance, code reviews, and rollout support to ensure a zero-downtime production transition.
- Tata 1mg

Software Development Engineer 1

Chandigarh
Jul 2024 - Apr 2026

- Owned end-to-end **Insurance Service**, serving **50K+ requests/day** with **sub-200ms p99 latency** across critical APIs; designed scalable data models, caching layers, and managed **3+ third-party integrations** along with production incident handling.
 - Engineered and scaled **Insurance Category & Super Top-Up** platforms by driving core business workflows, schema architecture, backend APIs, and external partner integrations.
 - Implemented asynchronous invoice processing workflows involving PDF generation and S3 uploads, removing blocking I/O from synchronous request paths and improving service resilience.
 - Enhanced critical API performance by reducing **p99 latency by 60%** through asynchronous notification orchestration and concurrent execution of WhatsApp, SMS, and Email provider calls.
 - Delivered backend integrations for **3 partner-specific initiatives**, extending complex 1mg services and owning key user journeys (**Home, PDP, Order History**) as the primary escalation owner, resolving high-priority production incidents within **12 hours**.
- App Team

Coordinator

NITH
Jan 2021 - May 2024

- Architected and developed backend APIs for a college fest management platform using **Node.js**, enabling streamlined coordination of events and activities through scalable service design.
 - Mentored junior batches through hands-on workshops on **Git** and **GitHub**, covering version control workflows, collaboration practices, and code management fundamentals.
- Coding Shuttle

Problem Setter

Remote
Jan 2023 - March 2023

- Designed and curated **80+ coding challenges** focused on strengthening problem-solving skills and improving the learning experience for platform users.

SKILLS SUMMARY

- Languages:

Python , Java , Ruby , C++

Frameworks:

Sanic , FastAPI , Ruby on Rails

Tools & Platform:

Git, Linux , Github , Bitbucket , Kafka , AWS (S3, SQS, SNS, EC2) , Kloudfuse , Sentry

Backend Concepts:

REST, Event-Driven Architecture, Async Processing, Indexing, Caching Strategies, Microservices

Databases:

MongoDB , PostgreSQL , Redis

Fundamentals:

DBMS , Operating Systems , Data Structures and Algorithms, Object Oriented Programming
Computer Networks

EDUCATION

- National Institute of Technology Hamirpur

Bachelor of Technology - Computer Science and Engineering; GPA: 9.01

Himachal Pradesh, India
Dec 2020 - June 2024

ACHIEVEMENTS

- 4 Star at CodeChef , MaxRating : 1828
- Specialist at Codeforces , MaxRating : 1418
- Ranked 92 in CodeChef Starters 46 among 2200+ participants
- Ranked 1486 in Codeforces Round 820 among 12000+ participants

PROJECTS

- Air India Maharaja Club:

Portfolio:

- Independently developed backend APIs for member ID validation and database reconciliation, enabling seamless SSO authentication flows while ensuring reliability across multiple edge-case scenarios.
 - Revamped corporate membership workflows to support dual association with standard and SSO corporates, collaborating cross-functionally to preserve existing user journeys and dashboard routing logic.
 - Designed and developed a personal portfolio platform showcasing projects, skills, and experience, integrating EmailJS-based communication workflows using **React.js** and **JavaScript**.
